Attorney Docket No. 9835-50223p

Earliest Priority Date Claimed: 08 April 2002 (08.04.02)

International Application No.: PCT/US03/10824

International Filing Date: 07 April 2003 (07.04.03)

Title of Invention: Flattened Helical Tire Cord

Applicants: TOKUSEN U.S.A., INC., et al.

IN THE UNITED STATES ELECTED OFFICE (EO/US)

INFORMATION DISCLOSURE STATEMENT

Applicants submit herewith patents, publications or other information of which they are aware, which they believe may be material to the examination of this application and in respect of which there may be a duty to disclose.

Some of the documents attached hereto may have markings thereon. No significance is meant to be attached to the markings. These documents are not necessarily analogous art.

The filing of this Information Disclosure Statement shall not be construed as a representation that a search has been made, an admission that the material cited is, or is considered to be, material to patentability or that no other material information exists.

The filing of this Information Disclosure Statement shall not be construed as an admission against interest in any manner. A list of the patents and other documents which accompanies this statement is set forth on the attached modification of Forms PTO/SB/08A and 08B. A copy of each of the items on the attached list is supplied herewith.

.

DH2 Rec'd PCT/PTO 2 8 SEP 2004 -

Japanese language reference BC is believed to be relevant in that it describes a steel cord where a sheath of 1 to 4 steel filaments is wrapped around a core of three steel filaments, where the core filaments are configured to be aligned parallel to, and in a side-by-side arrangement with, each other. An English translation of reference BC is included herewith.

Japanese language reference BD is believed to be relevant in that it describes a method of manufacturing a steel cord, wherein a lateral waveform, or a substantially spiral form, is applied to individual core strands, which are drawn parallel with the phases of the form in alignment, and the core stands are wrapped by a wrapping strand at a pitch equal to that of said form, and the steel cord around which the wrapping cord is wrapped is pressed so as to flatten it while applying a vertical waveform of the same pitch as that of said form. An English translation of reference BD is included herewith.

Reference CA is a copy of the international search report mailed 23 October 2003 for international patent application PCT/US03/10824. All of the documents cited in the international search report are separately cited herein.

Respectfully submitted,

Date: 29 Scotember 2004

Ray F. Cox, Jr.
